EXECUTIVE CANDIDATE PROFILE

Accomplished senior executive with unbroken record of delivering innovative and transformational information technology solutions in a variety of industries and multiple roles.

Results-oriented Chief Information Officer, with strengths in strategy development, technology, negotiations, operations, and enterprise program delivery. A unique offering of exceptional leadership skills coupled with wide-ranging management expertise.

Committed to the development of people and achieving results through informed and engaged teams.

Recognition / Achievements

- *Led corporate IT transformation moving to cloud solutions where appropriate in anticipation of a changing business model, a mobile workforce, and growth. Scope covered a transportation business with over 100 locations across North America and a workforce of 5000.*
- *Implemented a business intelligence program, exploring new ways to interpret and present information, including process quality metrics for the day to day management of the operation.*
- *Defined cyber security program, including initiatives to educate a diverse workforce.*
- *Directed all business functions to on-board numerous acquisitions, including a US acquisition that doubled the size of the company.*
- *Led a team of 170 professionals to provide cost effective shared services to the North American operation. Portfolio included IT, Financial Services, Strategic Planning, Internal Audit, Facilities, Purchasing and Risk & Insurance Services. Personally negotiated national supplier contracts across this varied portfolio to save \$25M in direct costs.*
- *Successfully planned and oversaw all aspects of moving the corporate office (financial, people) to an open-plan suburban location. A collaborative office space was created, into which the staff moved with no disruption of services. The legacy data center was decommissioned, and servers relocated off-premise.*
- *Managed a commercial software product development team. Rescued a failing project by regaining customer confidence, delivering on schedule, and implementing quality measures into the software delivery process.*

Education / Designations

- *University of Calgary*
- *Bachelor of Science in Computer Science*
- *Second Major, Economics*

Hobbies / Interests

- *Married, two grown children*
- *Avid swimmer and hiker*
- *Travel is not an issue*
- *Holds Canadian and USA citizenship*
